

1    **Abstract of Disclosure**

2    A nail stapler includes a magazine, a nozzle and a hammering device.  
3    The magazine stores nails.    The nozzle prevents jam via allowing only  
4    leading one of the nails to the hammering device.    The hammering  
5    device is capable of hammering leading one of the nails more than once  
6    until it hammers the leading nail completely into an object.
